RE: Approval of the Medley Farm Superfund Site Remedial
Investigation Report and Feasibility Study Document

Dear Ms. Norville

The Agency received the revised Remedial Investigation (RI) report on February 15, 1991. This revision of the RI was based on comments the Agency sent to the Potentially Responsible Parties (PRPs) in a correspondence dated January 22, 1991. Overall, the PRPs adequately addressed the Agency's comments and concerns, therefore, the Agency approves the February 15, 1991 version of the RI report.

Likewise, the Agency received the revised draft Feasibility Study (FS) document on March 13, 1991. This revision of the FS was based on comments and concerns the Agency sent the PRPs in a correspondence dated February 5, 1991. Following the review of the March 13 version, the Agency communicated additional comments on the FS document to the PRPs via a telephone conference call on April 18 and a telephone conversation/facsimile on April 29, 1991. These additional comments requested the PRPs to revise the Baseline Risk Assessment section of the FS. Copies of the revised FS were received by the Agency on May 2, 1991. Following the Agency's review, the Agency finds the May 2 version of the FS acceptable.

I have enclosed a copy of the Risk Assessment Certification, signed by Elmer Akin, EPA Region IV, Health Assessment Officer.
